

## Project – Streaming Services

Nic, Zach, Mauricio

For our project we have elected to research streaming services (ss). Since wallet's are tight and streaming services are increasing their monthly costs we wanted to know where you get the most bang for your buck. To do that we will research a few major ss and identify a few key factors that may assist in a families decision making when choosing a service; Overall Ratings, Family Functionality, Release Year, etc.

Dataset to be Used:

[Amazon Prime Movies and TV Shows \(kaggle.com\)](#)

[HBO Max Movies and TV Shows \(kaggle.com\)](#)

[Netflix Movies and TV Shows \(kaggle.com\)](#)

Questions –

- What are the top 20 shows and movies on each SS (streaming service)
- Which SS had a greater variety of shows based on release year (50's, 70's, 90's, etc.)
- Comparing genres counts for each SS
- Does the number of seasons per show influence its IMDb score
- What is the average IMDb score for each SS
- What is the average rating on each platform (G, PG, T, R)
